PROFILE OF SCIENTIST/RESEARCH WORKER***Name:* Dr. Biplab Patra*****Address* Ananda Mohan College, 102/1, Raja Rammohan Sarani, Kolkata-700009*****Telephone* (033)24417851*****E-mail* patrabp@yahoo.co.in*****Qualification:* Ph.D. in Botany*****Area(s) of Specialization:* Pteridology*****Occupation/Designation:* Associate Professor*****Major Activities:* Active researcher on pteridophytes, company commander of NCC wing, NSS Programme Officer and active social reformer*****Awards/Recognitions:* Nil*****Brief Summary of Pteridological Research:* Working on animal interaction with pteridophytes. Basically it was my deep interest from student life to know the truth behind the less exploitation of ferns by insects. I have found some interesting interaction between insects and ferns where ferns are not less damaged compared to angiosperms. At the present level of research on this particular field I firmly believe that pteridophytes are not at all less exploited by insect but such age old belief is mainly due to lack of research.**
